

BENEFITS

CASE Spec provides many benefits. Some of the benefits are given below.

Low Total Cost of Ownership

- CASE Spec is the most affordable RM/ALM enterprise solution on the market.
- A fraction (1/10 to 1/20) of the cost of other development tools
- Package includes a free enterprise embedded database
- Floating licenses
- Perpetual (non-expiring) licenses
- Fully user-configurable
- Virtually zero administration and configuration

Scalable enterprise solution

CASE Spec is an enterprise solution that is scalable from 1 to 1000s of concurrent users and for unlimited number of projects. CASE Spec can handle terabytes (TBs) of data.

High performance application

CASE Spec is a high performance multi threaded and multi-tier application. CASE Spec is useful for small projects that contain hundreds of items to very large projects with tens of thousands of items. Unlike other tools, which provide slow performance for large sets of items and other artifacts, CASE Spec provides peak desktop performance across LAN, WAN and wireless Internet connections.

Security

Securely exchange data with built-in encryption.

Process independent and technology neutral

CASE Spec provides a generic set of tools that can be customized to fit any development approach whether it's Waterfall, Spiral, Agile, Scrum, V-model or hybrid. It can be used for any type of systems or software development projects.

Simple and flexible interface

CASE Spec provides a very easy to use and powerful user interface for your information management.
